

GROUP 23 - BODY

INSTRUCTIONS

FOR

ORDERING TRIM MATERIAL

The following pages contain line drawings of basic interior body trim sketches for use in ordering trim material. These drawings represent the various body styles and should be used in selecting the proper sketch for ordering material.

By placing a piece of tracing paper (or any piece of transparent paper) over the drawing which applies to the body style, it can be easily traced for the section for which the trim is being ordered. The particular design which varies in different vehicles can be drawn in to show the pattern and design. Then label each section with "A", "B", "C", etc. on the sketch and include a small piece of material also labeled to correspond to the sketch - see sample below.

Always furnish vehicle serial number. Also specify "right" or "left" when ordering material requiring this description.
