9-01-0 ENGINE ASSEMBLY

NOTE: The following symbols are used in connection with engine numbers:

Engine numbers without symbols indicate "Standard Cylinders and Crankshaft Bearings."

The Letter "A" immediately following the engine number indicated Bore .020" (.508 MM.) Larger than Standard.

The Letter "B" immediately following the engine number indicated Main and Connecting Rod Bearings .010" (.245 MM.) Smaller than Standard.

The Letters "AB" immediately following the engine number indicate Cylinder Bore .020" (.508 MM.)

Larger than Standard and the Main and Connecting Rod Bearings .010" (.254 MM.) Smaller than Standard.

The Letters in the circular pads at either end of the engine number are for the use of factory inspectors only and should not be connected with the engine number. Always mention Serial Numbers when ordering major assemblies.

9-09-0 CRANKSHAFT BEARING PACKAGES

NOTE: When .001 thicker wall crankshaft main bearings are used for engines in production an identification mark is stamped on the machined surface of the crankshaft center counterweight for six cylinder engines and No. 3 counterweight for V8 cylinder engines. When the thicker wall crankshaft bearings are used the crankshaft will be marked M1, M2, M3, M4 or M5 depending on which journal has the .001 thicker wall bearing.

NOTE: Crankshaft Bearing Packages consist of one upper and one lower bearing.

9-32-0 CONNECTING ROD BEARING PACKAGES								
NOTE: When .001 thicker wall connecting rod bearings are used for engines in production an identification mark is stamped on the machined surface of the crankshaft center counterweight for six cylinder engines and No. 3 counterweight for V8 cylinder engines. When the thicker wall connecting rod bearings are used the crankshaft will be marked R1, R2, R2, R4 or R5 depending on which journal has the .001 thicker wall bearing.								
NOTE: Connecting rod bearing packages consist of one upper and one lower bearing.
